OBJECTIVE

Full-stack developer with 3+ years of experience building scalable, production-ready web applications using JavaScript, React, Node.js, and modern CSS. Experienced in designing RESTful APIs, applying Test-Driven Development, and delivering secure, accessible user-centric solutions. A fast learner and proactive team player with a strong focus on clean architecture, code quality, and building reliable systems that scale.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Three.js, Redux, Zustand, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, Mongoose, SQL, JWT, Microservices Architecture

Tools: Microsoft Dynamics 365, Azure DevOps, Postman, Figma, Git/GitHub

Other Skills: RESTful API Design, Agile/Scrum Methodologies, Cross-Browser Compatibility

EXPERIENCE

Software Developer, *Okruti IT Consulting Pvt. Ltd.* Feb 2023 – Present

- Developed scalable, maintainable user interfaces with clean frontend architecture, efficient state management, and reusable components, including advanced 3D visualizations using Three.js/React Three Fiber with optimized rendering performance.
- Integrated and consumed RESTful APIs, handling authentication, validations, asynchronous workflows, and polling mechanisms to ensure reliable and structured data flow across the application.
- Designed and managed backend data layers using Test Driven Development, implementing secure database operations, token-based authentication, RBAC, and protection against common security vulnerabilities.

PROJECTS

RCR Mining Dynamics 365 Commerce | *Msdyn365, Three.js, TypeScript, React, SCSS*

- Implemented high-performance 3D model rendering to visualize complex assets, enabling interactive inspection and improving usability for technical users.
- Designed and integrated short and long polling mechanisms in the Raise Query workflow to ensure near real-time updates and reliable synchronization of user queries.
- Improved application performance and stability by optimizing render cycles, state management, and asynchronous data handling, reducing UI lag during heavy data and 3D interactions.

Identity and Access Management | *React, TypeScript, Zustand, Tailwind, Express.js, MongoDB*

- Designed and implemented secure authentication and authorization flows, managing user identities, roles, and fine-grained access using RBAC across the application.
- Integrated secure backend workflows including token-based authentication, session management, and access validation, improving overall system security and reliability.

People Nest – Human Resource Management System | *React.js, TypeScript, Ant Design, SCSS*

- Built a modular frontend architecture with component-driven design, structured state management, and form-based workflows to support employee lifecycle operations within the HRMS.
- Implemented secure backend APIs and data workflows with JWT-based authentication, role-based access control (RBAC), request validation, and authorization, ensuring confidentiality and integrity of sensitive HR data.

EDUCATION

University Institute Of Engineering And Technology, Kurukshetra Aug 2018 – May 2022

Bachelor's of Technology - ECE Kurukshetra, Haryana
